Introduction

These Information Disclosure documents are submitted by Alpine Energy Limited pursuant to subpart 3 of Part 4A of the Commerce Act 1986 in accordance with:

- The Electricity Information Disclosure Requirements issued 31 March 2004, consolidating all amendments to 31 October 2008,
- The Electricity Distribution (Information Disclosure) Requirements 2008,
- The Electricity Information Disclosure Handbook (as amended 31 October 2008), and
- The Handbook for Optimised Deprival Valuation of System Fixed Assets of Electricity Lines Businesses (30 August 2004).

DISCLAIMER

The information disclosed in this 2011 Information Disclosure package issued by Alpine Energy Limited has been prepared in accordance with the requirements listed above.

The Requirements require the information to be disclosed in the manner it is presented.

The information should not be used for any other purposes than that intended under the Requirements.

The financial information presented is for the line business as described within the Requirements. There are also additional activities of the Company that are not required to be reported under the Requirements.

Alpine Energy Limited has no non-contiguous networks and is not consumer controlled and therefore additional disclosures under clauses 6(1)(b) and 6(1)(c) of the Electricity Distribution (Information Disclosure) Requirement 2008 are not required.

73	less	Net Electricity Supplied to (from) Other EDBs			
74		Electricity entering system for supply to customers' Connection Points	735		
75	less	Electricity Supplied to Customers' Connection Points	717		to MP2
76		Electricity Losses (loss ratio)	18	2.4% %	
77					
78		Electricity Supplied to Customers' Connection Points	717		
79	less	Electricity Supplied to Largest 5 Connection Points	172		
80		Electricity supplied other than to Largest 5 Connection Points	545	76% %	
81					
82	Load	d Factor	69% %		
83					
84	Nun	ber of Connection Points (at year end)	30,826 ICPs		to MP2
85					
86	Inte	nsity of service requirements			
87		Demand Density (Maximum Distribution Transformer Demand / Total circuit length)	30 kW/km		
88		Volume Density (Electricity Supplied to Customers' Connection Points / Total circuit length)	174 MWh/km		
89		Connection Point Density (ICPs / Total circuit length)	7 ICP/km		
90		Energy Intensity (Electricity Supplied to Customers' Connection Points / ICP)	23,256 kWh/ICP		

Notes:

Line 17 includes 7.2 km of 6.6 kV underground SWER, as this cannot be entered in line 15.

The Distribution Transformer Capacity (EDB Owned) (row 35) rating does not include any uplifts due to cooling mechanisms as these are not considered to be significant across all transformers.

The Estimated Portion of Assets within 10 years of Total Life (line 46) is based on the age and replacement costs of Subtransmission Lines and Cables, Distribution Lines and Cables, Low Voltage Lines and Cables and Distribution Transformers. It is assumed that the other system fixed asset categories have similar age and replacement cost profiles.

The Time of System Maximum Demand (row 55) was at trading period 17, on 4 November 2010. It is estimated that no load control was in operation during the System Maximum Demand.

REPORT MP3: PRICE AND QUALITY (cont)

Notes to Price and Quality Measures

	MP3a: Connection Point Class breakpoints	
90 91	Connection Point Class breakpoints methodology	Metering installation category based breakpoints
92 93 94	kVA based breakpoints - additional disclosure Breakpoint between small and medium classes	kVA
95 96	Breakpoint between large and medium classes	kVA

Notes:

For previous information disclosures, interruption forecasts in lines 62 and 63 were based on historical information for the five year period ending on 31st March 2003, in line with the targets set for threshold compliance reliability. For this disclosure, these forecasts have been revised to take account of the impact of very strong load growth in recent years. This has had an impact on interruptions in two ways. There are more planned interruptions to allow for expansion and strengthening of the network, and there are an increasing number of unplanned interruptions resulting from an overloading of components of the network.

Alpine Energy currently reconciles all customer volumes at the Transpower GXP level and not at the ICP level, except for Time of Use (TOU) customers which have metering which records half hour data records. Alpine Energy receives information from Retailers that determines the electricity supplied to low user consumers.

Consequently, Alpine Energy sought an exemption from the requirement to disclose connection point class pricing for the 2008 Information Disclosure. Subsequently, the Commerce Commission granted a partial exemption and requested the information be provided on the basis of TOU and LOW data that is known, with the Medium Class being the remainder. As, in effect, there was no partial exemption (because all customers were included in a class). The same methodology has been used for the grouping of customers into the classes (listed below) for the 2011 Information Disclosure.

The Connection point classes have been derived on the basis set out in the Commerce Commission's 2008 request, as follows:

Small: Comprises of LOW users

Medium: Is the remainder of connected customers (which also includes some large Assessed Capacity sites)

Large: Includes all TOU Customers, except the largest.

Largest: Includes 5 ICPs for 4 customers – one customer has two ICPs in the top 5.

For sites in the medium grouping, no individual consumption information is available, so their consumption information is the National Reconciliation Manager's (NRM) Non-half hour (NHH) consumption minus the LOW users (for which Retailers provide monthly consumption information).

The LOW consumption information has no breakdown between day and night consumption. In terms of determining the line charge income for Small and Medium sites, the assumption has been made that the proportion of Day/Night usage for LOW sites is in line with the proportion for the Day/Night usage for all NHH sites.

Invoice items have been extracted out of the billing system per load group and these values have been pro-rated to the total line rental revenue (FS1, row F10).

The connection point class breakpoints have been defined on the basis of load groups. There is considerable over-lap in terms of kVA or kW ratings between load groups. LOW users typically have the same 15kVA rating as other domestic users. TOU consumers in the large category have maximum demands ranging from 20 to 4,238 kW, while ASS customers in the medium category have assessed demands ranging from 5 to 1,347 kW.

RELATED PARTY NOTE

Associated Entity: NetCon Limited (excl GST)

NetCon is 100% owned by Alpine Energy Limited and provided asset maintenance and construction services for the network from 1 April 2010 to 31 March 2011. Services were charged on both a fixed price basis or 'time and materials' basis.

During the period, this charge totalled \$10,609,408 (2010 \$10,611,190). The outstanding amount as at 31 March 2011 was \$1,596,873 (2010 \$1,282,061) payable on normal commercial terms.

No debts were written off or forgiven and no transactions took place at nil or nominal value.

During the period capital construction transactions totalled the following:

	2010	2011
	\$`000	\$`000
Asset Construction:		
Subtransmission assets	134	100
Zone Substations	203	2,346
Distribution and LV Lines	2,677	719
Distribution and LV Cables	1,340	1,957
Distribution Substations and Transformers	91	39
Distribution Switchgear	1,568	588
Other System Fixed Assets (as per the ODV Handbook)	341	0
Maintenance of Assets	4,257	4,860

Auditor's Independent Assurance Report

To the Readers of Alpine Energy Limited's Report for the Financial Year Ended 31 March 2011 regarding Alpine Energy Limited's Compliance with the Electricity Distribution (Information Disclosure) Requirements 2008

The Auditor-General is the auditor of Alpine Energy Limited (the company). The Auditor-General has appointed me, Fred Hutchings, using the staff and resources of PricewaterhouseCoopers, to provide an opinion, on her behalf, on the company's report for the financial year ended 31 March 2011 on pages 4 to 19 regarding compliance with the Commerce Commission's Electricity Distribution (Information Disclosure) Requirements 2008 (the Requirements). In this independent assurance report we refer to the company's report as the 'disclosure information'. The disclosure information comprises both historical and prospective financial and non-financial information.

Respective responsibilities

The Board of Directors is responsible for preparing disclosure information that complies with the Requirements.

Clause 10 of the Requirements requires the Auditor-General to provide an opinion on whether the disclosure information prepared by the company complies with and is presented in all material respects in accordance with the Requirements.

Limitations and use of this independent assurance report

This independent assurance report has been prepared solely to discharge the Auditor-General's responsibilities under the Requirements for the financial year ended 31 March 2011. This independent assurance report is not intended to be used for any purposes, other than that for which it was prepared.

Because of the inherent limitations in evidence gathering procedures, it is possible that fraud, error or non-compliance may occur and not be detected. As the procedures performed for this engagement are not performed continuously throughout the financial year and the procedures performed in respect of the company's compliance with the Requirements are undertaken on a test basis, our engagement cannot be relied on to detect all instances where the company may not have complied with the Requirements. Our opinion has been formed on the above basis.

Basis of opinion

The company's financial statements and annual compliance statement prepared pursuant to the Commerce Act (Electricity Distribution Default Price-Quality Path) Determination 2010 for the year ended 31 March 2011 have been subject to audit. The audit opinions on the financial statements and default price-quality path compliance statements of the company for the year ended 31 March 2011 were unqualified and were dated 24 June 2011 and 12 July 2011 respectively.

Our work has been planned and performed to obtain all the information and explanations we considered necessary in order to obtain reasonable assurance that the disclosure information complies with and has been presented in all material respects in accordance with the Requirements. We also included an assessment of the significant estimates and judgements, if any, made by the company in the preparation of the disclosure information.

A matter is material if it would affect a user's overall understanding of the disclosure information prepared by the company.

Historical financial and non-financial information

Our work on the historical financial and non-financial information has been carried out in accordance with the Standard on Assurance Engagements (New Zealand) 3100: *Compliance Engagements* issued by the New Zealand Institute of Chartered Accountants.

Our work in respect of amounts and disclosures that were not audited under the financial statement audit has been planned and performed to obtain all the information and explanations we considered necessary in order to obtain reasonable assurance that the disclosure information has been presented in all material respects in accordance with the Requirements.

Prospective financial and non-financial information

Our work on the prospective financial and non-financial information has been limited to assessing whether the information has been presented on a basis consistent with the regulatory accounting or technical measurement requirements used for disclosures for the financial year ended 31 March 2011 and the immediately preceding financial year, and that the information has been calculated based on source data provided by the company. We have not performed audit procedures on the source data.

We acknowledge that it is likely that actual results will vary from those forecasted, since anticipated events frequently do not occur as expected (and those variations may be significant).

Independence

When carrying out the engagement we followed the independence requirements of the Auditor-General, which incorporate the independence requirements of the New Zealand Institute of Chartered Accountants. We also complied with the Independent auditor provisions on independence, as specified in clause 2(1) of the Requirements.

In addition to the engagement, we have performed other audit assignments for the company. This involved issuing an audit opinion on the annual financial statements on behalf of the Auditor-General, and independent assurance opinions on the Electricity Distribution Default Price-Quality Path statement and information provided in response to the S53ZD information request. We have also provided other professional advisory services to the company. These assignments were compatible with the Auditor-General's independence requirements. Other than these assignments, we have no relationship with or interests in the company or any of its subsidiaries.

Opinion

We have obtained all the information and explanations we have required.

In our opinion:

- the company has kept proper records to enable the complete and accurate compilation of required information, in all material respects, as far as appears from our examination of those records; and
- the disclosure information prepared by the company for the financial year ended 31 March 2011 complies with the Requirements.

Historical Financial and Non-Financial Information In our opinion, the company has:

- presented the historical financial information in reports FS1, FS2, FS3, AV1, AV2, AV3, AV4, MP2, MP3 and AM1 for the financial year ended 31 March 2011 in all material respects in compliance with the Requirements, and
- compiled the historical non-financial information included in reports MP1, MP2 and MP3 in accordance with the guidance (if any) issued pursuant to the Requirements, and has calculated the historical non-financial information based on un-audited source data provided by the company.

Prospective Financial and Non-Financial Information

In our opinion, the company has:

- presented the prospective financial and non-financial information in reports AM1 and MP3 on a basis consistent with the regulatory accounting or technical measurement requirements used for disclosures for the financial year ended 31 March 2011 and the immediately preceding financial year; and
- calculated the prospective financial and non-financial information based on un-audited source data provided by the company.

Fred Hutchings U
On behalf of the Auditor-General
Christchurch, New Zealand
