

ASSET MANAGEMENT PLAN

PLANNING PERIOD: 1 APRIL 2018 – 31 MARCH 2028

CORRECTION

SCHEDULE 11a: REPORT ON FORECAST CAPITAL EXPENDITURE

In June 2018 it was discovered that the above schedule had an error in the Current Year (31 March 2018) in the 11a (i) Expenditure on Asset Forecast in nominal dollars.

The forecast values for Consumer Connections, System Growth, Asset Replacement, and Renewal, and Asset Relocations was reported as 2850, 2851, 2852 and 2853. The numbering appears to have been an error using the autofill function in Excel. These entries did not have a flow-on effect into future years of the Asset Management Plan (AMP)

A request was sent to the Commerce Commission notifying them of this error, and Alpine Energy has subsequently been issued a notice to re-publish the schedules with the correction.

The schedules were re-published on 11 September 2018.
